

Euroclean GD930 Canister Vacuum

- **4 gallon (15 L) dust collection bag** wraps around motor assembly to cut down noise. Motor has thermal overload protection
- **Injection molded cover** with integral carrying handle for portability
- **Durable chrome plated steel tank** has wraparound vinyl bumper to protect walls and furniture
- **Dual mode floor tool** suitable for all surfaces
- **Foot operated on/off switch**

The Euroclean GD930 canister vacuum is quite simply our biggest, most powerful and best canister vacuum. It features our largest dust bag (4 gallons) so that you can vacuum longer without having to stop and change bags. Both standard and high filtration bags are offered. The Euroclean GD930 is available with an oversized true DOP MIL-STD-282 H.E.P.A. filter mounted before the motor. The huge surface area results in less restricted air flow to maximize vacuum performance no matter what type of material is being vacuumed. With 2,880 square inches of filter media, the filter can be used longer before it needs to be replaced.

Trusted. Reliable. Efficient.
