

Cleaner Facilities are Healthier Facilities.

Clarke®

Trusted. Reliable. Efficient.

A Nilfisk-Advance Brand

Healthier facilities start with more productive cleaning practices.
Clarke can show you how.

Reduce HAI's and enhance cleanliness while increasing productivity.

Enhanced cleaning practices are not only possible, but more productive, with Clarke solutions for the healthcare industry. As one of the world's leading brands of commercial floor care and cleaning equipment, Clarke can show you how to elevate the overall health of your care facilities, reduce the threats of healthcare-associated infections, improve patient experience and maintain a more sanitary environment – while actually reducing the amount of labor and resources required.

Exclusive Clarke cleaning solutions are designed to achieve higher levels of cleaning performance, improve productivity and protect the health environment of facilities while reducing costs, staff requirements and consumables. Innovative technology and ease of use make our lines of automatic scrubbers, floor machines, burnishers, vacuums and carpet extractors more effective and more efficient. Floors are made cleaner and safer, using fewer chemicals and detergents, improving indoor air quality and safety for patients, staff and visitors.

Featuring powerful BOOST® technology, the **BOS-18** is the high-productivity orbital floor machine for small areas and detail work.

The **CarpetMaster® 215** dual motor upright vacuum offers more power and essential features such as onboard crevice and upholstery tools, while delivering quiet operation and HEPA filtration.

Improve your environment, patient satisfaction and reputation.

Clarke cleaning innovations are not only better for the environment at large, but also contribute to a healthier environment within your facility. Patients and staff will appreciate superior air quality, fewer chemical fumes and a quieter environment. For improved indoor air quality (IAQ), Clarke vacuum cleaners employ multiple levels of filtration, including true HEPA filters designed to capture up to 99.97% of dust particles down to 0.3 microns. To minimize nauseous chemicals, Clarke scrubbers can remove floor finish with water only. Burnishers and vacuums allow daytime cleaning, operating quietly with a sound level less than 70 dB A. Battery powered machines offer even quieter operation. Clarke carpet extractors and vacuums are certified by the Carpet and Rug Institute for superior performance.

« *On the cover:* The **Focus® II BOOST®** compact 20 inch automatic scrubber offers up to a 70% reduction in water, chemicals and labor, with the ability to remove floor finish using only water.

A COMPREHENSIVE LINE OF FLOOR CLEANING SOLUTIONS FOR HEALTHCARE

VACUUMS CARPET EXTRACTORS

The lightweight **Comfort Pak** vacuum features an innovative ergonomic frame for superior comfort and support, plus easy, mess-free bag changes.

The new **Focus® II MicroRider™** is our most compact and maneuverable rider scrubber, and is available with BOOST® Technology.

BOOST® your cleaning effectiveness and productivity.

EVS Directors and managers at healthcare facilities, including hospitals, long- and short-term care, clinics and labs, continually seek enhanced cleaning solutions. Our award-winning BOOST® Technology for automatic scrubbers represents the level of innovation Clarke healthcare solutions bring to your facility. With BOOST, superior deep scrubbing results and single-pass floor finish removal can be achieved using water only with just one operator.

Clarke cleaning solutions:

- Increase staff productivity while lowering overall cleaning and maintenance costs
- Enhance sanitary conditions and overall facility health
- Improve indoor air quality and minimize noise levels while cleaning
- Intuitive operation and simple controls make training and implementation fast and easy
- Make cleaning tasks less labor intensive
- Foster a healthier environment for patients, staff and visitors

"BOOST® is the *only* way to go for medical centers. One person can strip floors during the day and the night person can come in and reapply wax. There is a 70-percent savings in manpower alone, along with a 60-percent savings in chemical use."

Manager of Environmental Services

Adirondack Medical Center, Saranac Lake, NY

The **Ultra Speed® 20** battery-powered burnisher provides superior dust control for improved indoor air quality.

FLOOR MACHINES & BURNISHERS

AUTOMATIC SCRUBBERS

SWEEPERS

Comprehensive floor cleaning solutions for over 90 years.

Since 1916, Clarke has been a driving force in productivity for floor cleaning. We are an industry-leader whose product developments include battery-powered automatic scrubbers, dual-motor commercial vacuum cleaners, carpet extractors, and most recently, the acclaimed BOOST® Technology that has revolutionized floor care productivity and environmental sustainability.

Clarke products are recognized for their superior performance, ergonomics and technology that makes our floor care equipment more reliable and easier to operate. Clarke's certified dealer network numbers over 1,300 locations in the U.S. alone, assuring personal service, expert advice, responsive assistance, and complete support and parts availability, backed by one of the world's leading and most enduring commercial floor care brands. For superior floor care solutions for the healthcare industry, no other brand offers Clarke performance.
