

Clean Track 16, 18, & Wash & Rinse

Feature What it is	Advantage What it does	Benefit How it helps me
Precision balanced center of gravity	Easy maneuverability	Less effort required - more ergonomic, more productive
Clear dome	Recovered solution can be viewed during operation	Allows operator to see recovery performance as well as any tank foaming issues
PolyDur rotationally molded tanks	Rugged non metal construction	No corrosion added durability
Overfill and debris protection for vacuum motor	Prevents liquid ingestion into vacuum motor	Extends life and adds durability to vacuum system
Large tank openings	Easy access to solution and recovery tanks	Solution tank can be filled/cleaned easily with hose or bucket
100 mesh solution filter with 300% more surface area	Better solution filtration	Less clogging of screen and nozzles
Independently self aligning vacuum shoe	Maintains better vacuum seal	More recovered water
No tools quick lock vacuum shoe	Easy shoe removal	Pull pin release vacuum shoe provides quick and easy clean up and maintenance
Larger capacity	Less dump and refill required	Greater productivity
Smaller footprint	Increased maneuverability	Less effort required to transport and store the machine
50' of power cable	Longer Reach Less Down time	Increased productivity
Twist lock hospital grade plug (Wash & Rinse)	No cord management required for dump and refill	Less down time more productivity
Quickly releases the cord from the machine		Simple and intuitive controls - reduce training requirement
Clear solution tube	Visual indication of solution level	
Removable Chemical tank (Wash & Rinse)		
3 position solution control	Independent solution control	Provides more operator control of solution
Dashboard controls easy to see and understand	Good visual indication easy access	Simple and intuitive controls - reduce training requirement
Infinitely variable solution flow (Wash & Rinse)	Allows operator to set interim to restorative cleaning modes	Provides precise control of the solution applied for better cleaning and faster dry time
Overload protection for motors	Prevents operating in an overloaded condition	Reduces machine damage and maintenance down time
High dump drain	Completely drain into 5 gallon bucket or toilet	Allows flexibility in dump and refill locations
Auxiliary power ports for optional cleaning tools	Ability to add hand tools or wand for additional application requirements when needed	Provides ability to cleaning upholstery or hard to reach areas
Adjustable brush pressure	Easily adjust for differing pile heights and surfaces	Provides configurability for best cleaning result
Quick change nozzles no tools	Easy nozzle removal	Quick change nozzle provides easy clean up and maintenance of nozzle
Large orifice nozzle	Dramatically reduced clogging potential	Less down time more productivity
Quick change brush	No tools required	Quick change brush provides easy clean up and maintenance of brush
Laminar air flow vacuum shoe	Continually increases air speed	Less water fall out produces a dryer floor
Clam shell frame design	Two bolts removal to access major components	Easy service access
Quick change Hard floor kit option	Dual purpose use soft or hard floor	No tools conversion from a carpet machine to a cylindrical scrubber - truly two machines in one
Quite		
Wash & Rinse one pass extraction	Scrubs and rinses in a single pass to get the soap out	Cleaner carpets, higher productivity, re-soils less quickly reducing costs and extending carpet life
ErgoEX ® support belt	Allows legs to pull the machine instead of arms, shoulders, & back	Less operator fatigue - Higher productivity
Wash & Rinse ®	Gets carpets cleaner	A solution spray is scrubbed into the carpet by a cylindrical brush, and then rinsed clean with water
Wash & Rinse ®	Clean water rinses the soap and dirt out of carpets in just one pass	Cleans the same way as when you wash and rinse your hair clean
Wash & Rinse ®	Re-soils slower	Soap is designed to be a dirt sponge attracting dirt and then holding on to it. Have you seen crystal or china that was not rinsed properly? With out rinsing carpets hold on to soap and dirt in just the same way.
