Super 7R Edger

The Super 7R is a powerful, versatile, and easy to use wood floor edging machine that has earned its reputation as an industry leader. With a new dust pipe design, a quick release dust bag, and the ability to attach directly to a vacuum, this edger continues to outpace the competition.

- Hardened steel pinion with brass drive gear reduces vibration
- Precision-balanced sanding pad produces finer finish
- Powerful 1 hp motor maintains speed under the heaviest cutting conditions
- Rotating dust pipe swivels 210 degrees to allow access to tight spaces
- Quick release dust bag that slides on and off with a simple twist and pull
- Easily attached to 1-1/2 inch or 2 inch vacuum hoses for improved dust containment

Rotating dust pipe allows the dust bag or hose connection to move freely during operation. The Super 7R pipe rotates 210° and the B-2+ pipe rotates 260°.

Patented quick release bag uses an interior rib to secure itself to the dust tube. No strings needed.

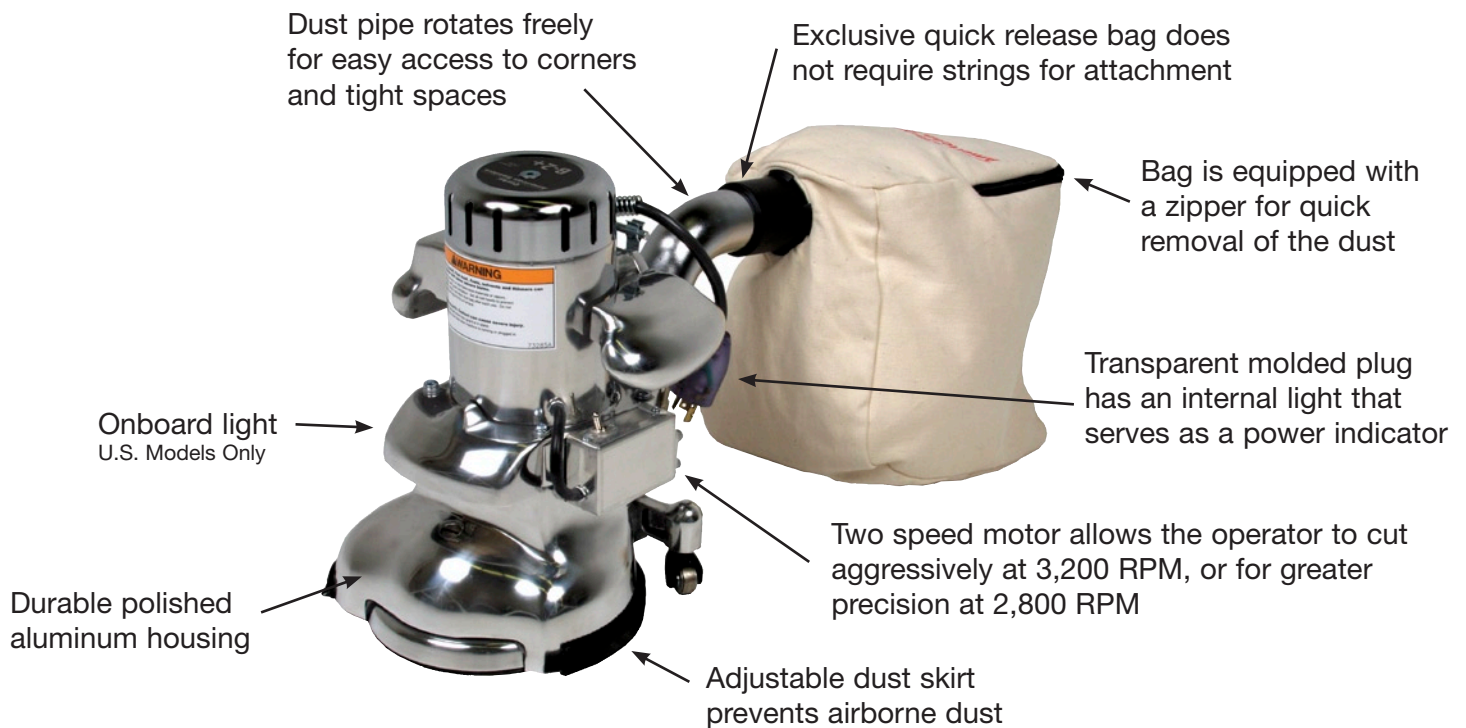

The channel feature in the dust tube securely locks the dust bag in place, yet allows it to be removed with a simple twist and pull.

B-2+ Edger

The professional's choice for 50 years, the B-2+ offers a 3,200 RPM setting for fast aggressive cutting and a 2,800 RPM setting for greater precision. With a new dust pipe design that allows this machine to be attached directly to a vacuum, as well as a new and innovative quick release bag design, this edger will remain the professional's preferred machine.

- Powerful 1 hp motor maintains speed under heaviest cutting conditions
- Long-lasting graphite brushes for extended brush and armature life
- Precision-balanced sanding pad produces finer finish
- Rotating dust pipe swivels 280 degrees for access to closets and tight spaces
- Innovative quick-release dust bag saves time and removes the hassle of strings
- Easily attached to 1-1/2 inch or 2 inch vacuum hoses for improved dust containment

Replace the bag with the hose adaptor and the edger can be easily hooked up to a 1-1/2 inch vacuum hose.

The new dust control features can be purchased as a retro-fit kit for other Super 7R and B-2+ models.

Non-marking urethane wheels are available as accessories for your Super 7R and B-2+ edgers.

SPECIFICATIONS	Super 7R	B-2+
Part Number	07125A (115 V)	07127A (115 V)
